Subject Index

Acidification 101, 297
Added N interaction 232
Age structure 9
Aggregation 91
Alfalfa 269
Alfisols 45
Ammonia toxicity 309
Ammonification 173
Ammonium excretion 1
Ammonium oxidation 263
Amynthas alexandri 9, 14
Anaerobic conditions 68
Aporrectodea caliginosa 154
Aquatic invertebrates 138
Arable soil 249
Aridisols 75
Aspergillus flavus 281
Aspergillus parasiticus 281
ATP content 297
Auxine 1
Azospirillum brasilense 1

Bacteria 201, 249
Bacterial counts 21
Bacterial-feeding nematodes 201
Bacterivorous nematodes 249
Barley 269
Basal respiration 301
Biocontrol 281
Biologically fixed N 80
Biomonitoring 177
Bradyrhizobium spp. 206, 314

^{14}C-labelled unripe straw 21
Calcareous soil 27, 257
Calcium carbonate 167
Carbon and nitrogen 249
Cast production 14
Catalase 237
Cellulose 68
Chloroform 191
Clover 121
CO_2 evolution 39
Cognettia sphagnetorum 201
Combustion byproducts 167
Coniferous forest 101
Coniferous humus 57
Cowpea 51
Crop residues 269
Cyanobacteria 129
Cyfluthrin 173
Cytokinin 51

2,4-Dichlor-phenoxy-acetic acid 1
Decomposition 45, 69, 225, 269
Dehydrogenase 237
Dendrobaena octaedra 201
Denitrification 219
Differential inhibition 263
Drying and rewetting 212
Dryland farming 108

Earthworm casts 154
Earthworms 9, 14, 185, 225
Electron acceptor 125
Electron microscopy 1
Enchytraeidae 201
Enzyme 276
Enzyme activities 185, 257
Enzymes 69
Ergosterol 57
Eucalypt forest 159
Exchangeable cations 154
Exchangeable K 154
Exchangeable K^+ 75
Extracellular enzymes 32

Faba bean 269
Farmyard manure 108
Fertilizer 108, 129, 138, 159, 297
Fertilizer N uptake 232
Fertilizer use efficiency 241
Fibre properties 225
Fire 115
Flavonoids 314
Fluorescein diacetate hydrolase 237
Fly ash 167
Forest clearance 91
Fractionation 196
Fumigation 191
Fumigation–extraction 301
Fungal: bacterial biomass ratio 39

Glomus pallidum 51
Glycine max 206
Grasses 75
Grassland 115
Growth rate 147
Growth stimulator 85
Gypsum 276

Harvest residues 225
Heavy metals 177
Heavy metals 257
Herbicides 309
Homogenization centrifugation 147
Hordeum vulgare 196
Humic acids 18
Humus 201
Humus layer 301
Hydrogen consumption 125
Hydrolysis 196

Imazethapyr 237
Immobilized enzyme 276
Infection 27
Inocula 85
Inoculation 121
Intercropping 80
Intercropping 241
Iron toxic soil 285
Iron toxicity 285
Isotope dilution 80

K_m 125
Knallgas bacteria 125

Legumes 80
Lens culinaris 108
Lentil 108
Lettuce 85
[^{14}C]-Leucine 147
Lime 201, 297, 301
Liming 285
Litter consumption 14
Litter decomposition 159
Low temperature 206
Lumbricidae 201
Lumbricus rubellus 154

Maize 1
Metabolic quotient 57
Methane consumption 263
Methanotrophs 263
Mica-rich soils 75
Microbial activity 69, 177
Microbial biomass 185, 212, 237, 301
Microbial C, N, P 91
Microbial diversity 177
Microbial nutrients 108
Microbial obiomass 39
Microcosm 249
Mineral N 32
Mineralization 21, 212, 249
Moisture 45
Molluscs 129
Municipal waste compost 257

^{15}N 32, 101
^{15}N-labelled fertilizer 232
N mineralization 173, 269
N transfer ^{15}N 80
N transformations 173
N_2 fixation 27
N_2, 314
Natural ^{15}N abundance 241
Nematoda 201
Nematophagous fungi 249
Nitrification 57, 173, 309
Nitrification inhibitors 314
Nitrogen 159, 173
Nitrogen fixation 1, 241
Nitrogen immobilization 219
Nodulation 121, 314
NPK fertilization 285
Nutrient cycle 101
Nutrient cycling 69
Nutrient stress 285
Nutritional properties 14

Organic manure 68
Organic manuring 39
Organic matter 32
Organic P fractions 68
Organic phosphorus 196
Organic S formation 289
Organic S mobilization 289
Organic sulphur 276

P addition 212
P inflow 206
Paddy soils 68
Paecilomyces lilacinus 281
Paranodulation 1
Pasture 91

Pasture 185
Pastures 80
Peat substitute composts 18
Pesticide 129, 138, 173
pH 154
Phosphatase 196
Phosphorus 159, 196
Pigeonpea 241
Pigeonpea 314
Pinus sylvestris 57
Pinus sylvestris L. 301
Plant effect 21
Population dynamics 9, 138
Pore location 191
Potassium acquisition 75
Primary production 129
Protease 237
Protozoa 201
Pseudomonas fluorescens 191

qCO_2 39

Rape 269
Reclamation 27
Rhizobia 27, 121
Rhizobium spp. 314
Rhizodeposition 21
Rice straw 45
Ricefields 129, 138
Roots 51

Sand prairie 115
Schizachyrium scoparium 115
Sclerotia 281
Semi-arid tropics 45
Sensitivity-resistance index 177
Shading 206
Silt and clay fractions 75
Soil 121
Soil arthropods 45
Soil bacteria 147
Soil C 91
Soil enzyme activity 167
Soil hydrogenase 125
Soil microorganisms 115
Soil N uptake 232
Soil organic matter 185, 276
Soil organisms 297
Soil properties 101
Soil quality 167
Soil respiration 18, 57
Solubilization 32
Sorghum 241
Spatial location 191
Storage 301
Straw decomposition 18
Subarctic soil 269
Submergence 285
Substrate respiration 57
Substrate-induced respiration 301
Sugarcane 225

Sulfate adsorption 289
Sulphatase 276

Temperature 314
[^{3}H]-Thymidine 147
Tillage 45
Total soluble N 32
Trichoderma spp. 85
Triticum aestivum 232
Tritium exchange 125

Upland rice 108
Urea 263
Urea hydrolysis 309

VAM 27
Vertical distribution 9
Vesicular-arbuscular mycorrhiza 51, 206
Vicia faba 27
Vigna unguiculata 51
V_{max} 125

Water-sediment system 219
Wheat 232
Worm gut 154

Zea mays 1
Zooplankton 129
